Portbase connects all parties in the logistics chains of Dutch ports. Through its Port Community System, Portbase facilitates the exchange of data between companies and the exchange of information with government authorities in order to allow everyone to work faster, more efficiently and at lower cost. Together with our growing community, we are continually adding value to this data sharing. Our goal: to make the Dutch port community, and thereby the ports themselves, the smartest in Europe. Portbase is a neutral, non profit organisation operating from within and for the port community.
